

## CSafe Continues to Expand Service Partner Locations

**September 9, 2011** – CSafe joined one of its newest service center partners for an openhouse in San Juan, Puerto Rico. The event was well attended as the CSafe customers shared the excitement about the latest addition to CSafe's growing service partner support locations. Activities included a demonstration of the CSafe AcuTemp RKN and a presentation of AcuTemp's temperature controlled active and passive solutions, followed by a luncheon.

With an ongoing strategy of opening service centers globally to ensure the needs of its customers are met, CSafe has added nine service locations to their network in the last six months. With the addition of a new service partner in Singapore, a similar event is planned in the near future. More events in the future will take place as CSafe continues to expand its global service locations.

CSafe, LLC provides solutions for the temperature-sensitive air freight market. Its flagship product, the AcuTemp RKN, is the first active controlled air container with FAA, EASA, Transport Canada, Hong Kong CAD, Irish Aviation Authority IAA and Israel CAA approvals. CSafe products are marketed through many global logistic partners and are designed to address the stringent requirements of the temperature sensitive air cargo market. Since its launch in 2008, thousands of successful shipments have been made with the AcuTemp RKN. Headquartered in Dayton, Ohio, USA, CSafe, LLC is a joint venture between AmSafe Inc. and AcuTemp Thermal Systems. AcuTemp is the world's largest producer of actively controlled mobile refrigeration units for life sciences, healthcare, military and international disaster relief agencies.
