

FOR IMMEDIATE RELEASE

CONTINENTAL AIRLINES CARGO SELECTS CSAFE FOR ITS COLD CHAIN PROGRAM

The first passenger airline capable of handling the AcuTemp RKN.

DAYTON, May 13, 2009 - CSafe LLC, today announced the selection of its AcuTemp RKN by Continental Airlines Cargo as part of its structured cold chain program. Continental Airlines is the first US passenger airline capable of handling the active cargo container.

"Continental is determined to offer our customers the most advanced cold chain technology available," said Mark Mohr, Continental's Manager, Product Development and Specialty Sales. "The AcuTemp RKN represents the latest addition to our ever-growing arsenal of temperature-sensitive shipping capabilities."

CSafe, headquartered in Dayton, Ohio, brings the latest cold-chain technologies to the emerging perishable shipping market. Its flagship product, the AcuTemp RKN, is the only FAA approved non-dry ice compressor-driven refrigeration unit permitted in the cargo section of an aircraft.

"The advanced thermal capabilities of the AcuTemp RKN will provide Continental Airlines Cargo with a state-of-the-art solution offering for their cold chain program", said Steve Boyd director of business development for CSafe. "Our v selection by Continental reinforces CSafe's position as a premier player in the active temperature marketplace and expands customers' options for temperature critical transportation," said Boyd.

The AcuTemp RKN is designed to address the detrimental effects of damaged and compromised goods which often result from inadequate temperature management in conventional shipping modes. In use since 2008, this innovative air cargo container has both cooling and heating capabilities and can sustain a consistent ambient in temperatures as extreme as -30 degrees Celsius to +50 degrees Celsius.

About CSafe, LLC

CSafe, LLC provides technology solutions for the perishable air freight market. Its flagship product, the AcuTemp RKN, is the first and only FAA approved temperature controlled cargo container used in the cargo section of an aircraft. CSafe products are marketed through several logistics partners and are designed to address the stringent requirements of the temperature sensitive air cargo market. CSafe, LLC is a joint venture between AmSafe Inc. and AcuTemp Thermal Systems, with locations in Washington state and Ohio. For more information, visit
